Introduction

Dr. Robert Bruce Banner, a top nuclear physicist, was caught in the blast from an exploding Gamma Bomb while trying to save his close friend Rick Jones. Having been exposed to a massive dose of Gamma radiation, Dr. Banner's genetic structure was inextricably altered, transforming him into a huge, green monster with super-human strength – a monster that has come to be known as "The Incredible HULK".

The Story So Far

The HULK has been taken prisoner by members of The Pantheon - a team of Super Heroes sent on special tactical missions. Their leader, Agamemnon, has determined that the HULK must be shown that his powers can be used for the benefit of mankind.

SET UP

This is the main menu. You may select between New Game, Password, Options, and Hall of Fame.

New Game

Selecting this feature will start a new game from the beginning of the story.

Password

PassWord: 115D040802

There are 3 stages in each Level, except for Future Imperfect. A password is awarded after completing each level. Selecting this feature will allow you to enter a password that will allow you to start at the beginning stage of the subsequent level to the one you have completed.

Move the Controller left or right to select the placement and Up or Down to cycle through the codes. Press X to accept the code.

Note: Memory cards are not supported.

Options

In the options menu, you can change the default settings for the game. Press UP or DOWN to move through the menu options. Press LEFT or RIGHT to change the volume for SFX and Music. You may also change the controller settings by highlighting the option CONTROLLER and pressing LEFT/RIGHT to access the different controller configurations. Select the difficulty for the game by choosing **Easy**, **Medium** or **Hard**.

The **Auto Run** feature enables the HULK to begin running automatically when the Controller is held in the same direction for 2 seconds. The default is **ON** but you can make the HULK run from standstill by holding L1 and pressing and holding the Directional Button for the direction you want HULK to run. Select X or **START** to return to the Main Menu.

What do those things on the screen mean?

1. Life Meter

As the HULK battles an enemy, he will sustain damage. Keep an eye out for Life Boost power-ups located throughout the game to remain lean, mean and green. Also, depending on the difficulty setting, your health automatically increases over time.

2. Gamma Meter

This indicates how much extra power the HULK has stored for Special Moves. As long as the HULK has stored energy, you can perform any Special Move. Save energy to battle larger enemies. Different types of special move use up more Gamma energy than others. The amount of Gamma energy used is also dependent on the difficulty setting.

3. Score

Tallies your progress.

4. Enemy Life Meter

Remaining energy for the area Boss.

5. Inter-Dimensional Transit Components

These are collected as the HULK makes his way through the game. Any pieces that are not collected will have to be fought for in the final encounter! Maestro holds the final piece and will only drop it if he is defeated by the HULK!

6. Calling Cards

Used to summon a Pantheon Member when the HULK needs help.

PICK UPS

Life Boost - Partially restates life force. If you have full health, life boosts will not be picked up.

Gamma Boost - Surges the HULK'S stored Gamma energy level. As with the Life boost, you cannot pick up additional boosters until you have less than maximum power.

Super Gamma - This will max out the HULK's Gamma level, allowing you to perform unlimited special moves for a short while. When collected, your Gamma meter will flash.

Double Damage - Doubles the damage the HULK can inflict upon enemies.

Emergency Team - The most powerful feature in the game. If you are lucky, you will find these as you progress through the game. Each calling card will summon the assistance of one of the four different members of The Pantheon that the HULK may call upon in various circumstances. Each calling card has a limited time of use. *Hint: Acting as smart bombs, they may be able to help you reach areas not previously accessible.*

Emergency Team Members

Ajax - He comes falling from the sky and charges in the direction that the HULK is facing when called.

Atalanta - She will fly around providing effective air support by shooting her flaming arrows at all enemies near the HULK.

Ulysses - He will appear on-screen and rapidly run in circles around The HULK providing protection and destructive assistance.

Hector - Stuns all enemies on-screen with his Mace. The HULK will then have a limited time to destroy them before they re-animate. They will also re-animate if touched by the HULK.

[illegible]

The HULK has been brought here by Rick Jones to help fight on evil, brutal ruler known as The Moestro. As it turns out, The Moestro actually IS the HULK.

This is the most difficult enemy since he

is to ensure the Time Machine is fully functional and eliminate the scourge of The Maestro forever. In order for the Time Machine to be activated, you must collect all four Inter-dimensional Transit Components. Components not collected during the game can be obtained by defeating The Maestro's guardians. The Inter-dimensional Transit Components have to be placed in the correct terminals in order to activate the Time Machine.

To place a component in a terminal press **START** and **SELECT** to display the

in-game options menu. You will notice that the Emergency Team members are now replaced by the transit components. You are unable to use the Emergency Team members as you are in the Future Imperfect. To select, move the highlight along to the required component then press SELECT then START to place the component in the terminal. The panels on each of the terminals must be pressed in the correct sequence to set the component. The Time Machine must be used to gain access to the areas where the terminals are situated and hence make it fully operational.

And now, how to defeat The Maestro ?
